# Rules

- Answers will be multiple choice or True/False.
- And there is no prize money!

# Clickers

We are going to be using audience response devices, or “clickers”. You just click the number when you want to answer.

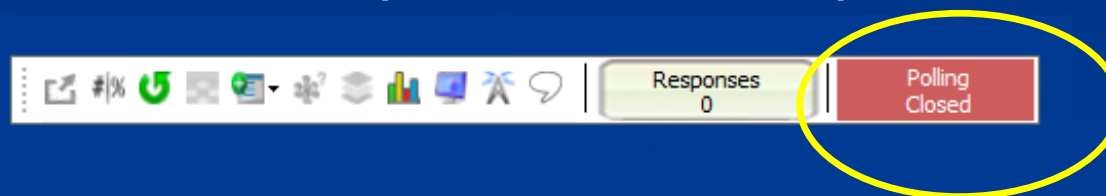

“**POLLING**” is the length of time from when the question is first displayed until the question is closed from further answers.

You can start answering as soon as the *polling square* (at the top right corner of the screen), turns green when the question is revealed.

I'll *close* polling as soon as I think most people have had a chance to answer the question. The square will turn red.

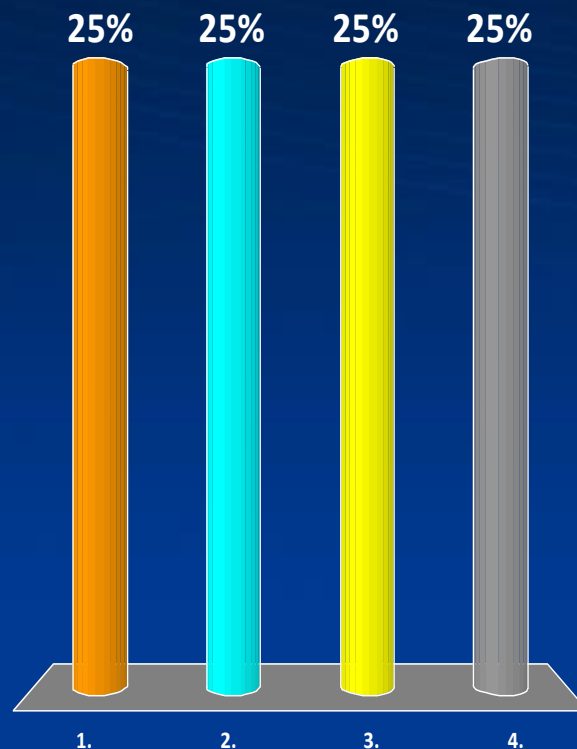

In addition, your ***first response*** on the clicker is the only one that counts. You cannot change your mind.

# Scoring Summary

- **Be Decisive:** Your first click is the only one that counts
- **Be Correct:** You only earn points for correct answers. No points are scored for wrong answers.
